

Founder's Message

Dear students,

Ugadi Shubhakankshalu, we wish you a Happy and prosperous **Telugu Samvatsaradi**.

Present Situation:

As we already know, Indian Govt. has declared lockdown due to corona virus up to **14th April 2020**, we also need to abide by the rules and stay self-isolated, as responsible citizens of India.

There's nothing more important to us than the well-being of our students and employees. As COVID-19 continues to spread, I want you to know we're doing all we can to support you and to continue your learning process.

Don't Panic:

In this situation, we request everyone, not to Panic and instead take this opportunity to revise the syllabus whatever you have studied till now. Also improve C programming & Embedded C skill set and revisit assignments.

Placement Opportunities:

Coming to placements, please be assured that, this lockdown is temporary, and once the situation gets back to normalcy, hiring will also start. We have to be prepared and ready for the opportunities.

Online Sessions:

The current lockout period should not hinder our passion towards learning embedded systems.

We have decided to start online classes from **28th March** onwards. We will get back with complete details and timings. Meanwhile please set up a proper internet connection for yourself and be prepared to attend the classes. In case you are not able to join the online classes because of any infrastructure issues at your place, do let us know.

Every alternate day we will send one C programming/ ALP question to everyone, for which we expect the solution from all of you in mail.

Lastly, please take good care of yourself and your loved ones. Stay safe. Stay healthy. Be patient and kind. There is no better time to strengthen our bonds, to stand together (digitally), to help each other through this storm, and come out the other side stronger.
